

## RFP #2019-JAN Questions & Answers

Answers noted in blue font.

### Questions asked during site visit:

1. Does the contract cover cleaning the individual airline counters in departures area?  
Yes
2. How much of the sidewalk outside of the terminal building is janitorial contractor responsible for?  
All sidewalk areas in front of terminal buildings (See Appendix C Exterior; Ap D #9).
3. Is the use of a leaf blower on the sidewalks permitted?  
Yes, if supplied by contractor and not disrupting the exit and entrance of the public.
4. How many janitorial staff are currently required?  
Usually 1 onsite, sometimes 2, dependant on task. You would be required to have enough man hours to complete the job to NWRA standards.
5. Approximate cost of janitorial supplies? Consumables?  
For the calendar year of 2016, we spent \$8378.88 on consumables (paper towel, bathroom tissue, garbage bags). Passenger traffic is 19% higher since then, as well as more bathrooms with the recent airport expansion.
6. Regarding the supplies used, would you be able to provide me with the required products that meet the standard criteria?  
We do not have these readily available, it would be as per manufacturers recommendations. You are free to come view the dispensers to see what you would need.
7. Regarding the quality of supplies used in the previous years, would I be able to see the inventory list and get an estimated expense of the supplies used.  
See Question #5 re: janitorial supplies.
